Volume 41, No. 1, August 2003

Special Issue on The Nature of Speech Perception
Guest Editor: M.E.H. Schouten

Papers

B. Schouten
Preface – The nature of speech perception (The psychophysics of speech perception III) 1

Introduction
S.K. Scott and R.J.S. Wise
Functional imaging and language: A critical guide to methodology and analysis 7
S.K. Scott and R.J.S. Wise
PET and fMRI studies of the neural basis of speech perception 23
N. Kraus and T. Nicol
Aggregate neural responses to speech sounds in the central auditory system 35

Speech in the auditing system

The bottom-up approach
B.J. May
Physiological and psychophysical assessments of the dynamic range of vowel representations in the auditory periphery 49
K.R. Kluender, J.A. Coady and M. Kiefte
Sensitivity to change in perception of speech 59

The top-down approach
B. Schouten, E. Gerrits and A. van Hessen
The end of categorical perception as we know it 71
B.C.J. Moore
Speech processing for the hearing-impaired: successes, failures, and implications for speech mechanisms 81

The neural code: modulations

Slow modulations (<30 Hz)
S.W. Wong and C.E. Schreiner
Representation of CV-sounds in cat primary auditory cortex: intensity dependence 93

doi:10.1016/S0167-6393(03)00130-4

X. Wang, T. Lu and L. Liang
Cortical processing of temporal modulations 107

Rapid modulations
P. Heil
Coding of temporal onset envelope in the auditory system 123
I.M. Winter, A.R. Palmer, L. Wiegrebe and R.D. Patterson
Temporal coding of the pitch of complex sounds by presumed multipolar cells in the ventral cochlear nucleus 135

Animal processing
E. Covey
Brainstem mechanisms for analyzing temporal patterns of echolocation sounds: a model for understanding early stages of speech processing? 151
D. Margoliash
Offline learning and the role of autogenous speech: new suggestions from birdsong research 165
K.-H. Esser
Modeling aspects of speech processing in bats—behavioral and neurophysiological studies 179

Plasticity

Physiology
N. Suga, X. Ma, E. Gao, M. Sakai and S.A. Chowdhury
Descending system and plasticity for auditory signal processing: neuroethological data for speech scientists 189
H.R. Dinse, B. Godde, G. Reuter, S.M. Cords and T. Hilger
Auditory cortical plasticity under operation: reorganization of auditory cortex induced by electric cochlear stimulation reveals adaptation to altered sensory input statistics 201

Development
L. Polka and O.-S. Bohn
Asymmetries in vowel perception 221
T. Nazzi and F. Ramus
Perception and acquisition of linguistic rhythm by infants 233

Language processing
D. Poeppel
The analysis of speech in different temporal integration windows: cerebral lateralization as 'asymmetric sampling in time' 245
J.M. McQueen, A. Cutler and D. Norris
Flow of information in the spoken word recognition system 257
Advance table of contents 271

Volume 41, Nos. 2–3, October 2003

Papers

J. Zheng, H. Franco and A. Stolcke
Modeling word-level rate-of-speech variation in large vocabulary conversational speech recognition 273

E. Janse, S. Nooteboom and H. Quené
Word-level intelligibility of time-compressed speech: prosodic and segmental factors 287
O. Engwall
Combining MRI, EMA and EPG measurements in a three-dimensional tongue model 303
M. Elhilali, T. Chi and S.A. Shamma
A spectro-temporal modulation index (STMI) for assessment of speech intelligibility 331
P. Niyogi and P. Ramesh
The voicing feature for stop consonants: recognition experiments with continuously spoken alphabets 349
H. Yamamoto, S. Isogai and Y. Sagisaka
Multi-class composite *N*-gram language model 369
S. Özaydın and B. Baykal
Matrix quantization and mixed excitation based linear predictive speech coding at very low bit rates 381
E. Visser, M. Otsuka and T.-W. Lee
A spatio-temporal speech enhancement scheme for robust speech recognition in noisy environments 393
C.-T. Lu and H.-C. Wang
Enhancement of single channel speech based on masking property and wavelet transform 409
G. Meyer and R. Morse
The intelligibility of consonants in noisy vowel–consonant–vowel sequences when the vowels are selectively enhanced 429
C.T. Ishi, K. Hirose and N. Minematsu
Mora F0 representation for accent type identification in continuous speech and considerations on its relation with perceived pitch values 441
J. Häkkinen, J. Suontausta, S. Riis and K.J. Jensen
Assessing text-to-phoneme mapping strategies in speaker independent isolated word recognition 455
J. Chen, K.K. Paliwal and S. Nakamura
Cepstrum derived from differentiated power spectrum for robust speech recognition 469
P. Sivakumaran, A.M. Ariyaeeinia and M.J. Loomes
Sub-band based text-dependent speaker verification 485
M. Richardson, J. Bilmes and C. Diorio
Hidden-articulator Markov models for speech recognition 511

Volume 41, No. 4, November 2003

H. Altınçay and M. Demirekler
Speaker identification by combining multiple classifiers using Dempster–Shafer theory of evidence 531
A.M. Peinado, V. Sánchez, J.L. Pérez-Córdoba and Á. de la Torre
HMM-based channel error mitigation and its application to distributed speech recognition 549
J.-H. Kim and P.C. Woodland
A combined punctuation generation and speech recognition system and its performance enhancement using prosody 563

S. Molau, D. Keysers and H. Ney
Matching training and test data distributions for robust speech recognition 579
T.L. Nwe, S.W. Foo and L.C. De Silva
Speech emotion recognition using hidden Markov models 603
G. Kochanski, C. Shih and H. Jing
Quantitative measurement of prosodic strength in Mandarin 625
I. Zitouni, H.-K. Jeff Kuo and C.-H. Lee
Boosting and combination of classifiers for natural language call routing systems 647
E.-K. Kim, W.-J. Han and Y.-H. Oh
A score function of splitting band for two-band speech model 663
